

## OXO DEGRADABLE CUTLERY

YES ECO™ Oxo-Degradable cutlery is lightweight, but very strong & sturdy. This product is made from polypropylene, however it contains an additive which accelerates the plastic degradation process by several orders of magnitude. The first process occurs whereby the long polymer molecules are reduced to shorter and shorter lengths and undergo oxidation. This process is triggered by heat, UV light and mechanical stress in landfill – wind & pressure. Particals become small enough to be ingestible by micro-organisms, setting the stage for biodegradation to begin. This is the second stage micro-organisms consume the plastic. Only carbon dioxide, water and biomass remain and are returned to nature.

This product reduces your usage of non-renewable resources, and in landfill will break down more rapidly than plastic. Using it will show your customers that you care about the environment.

Item	Material	Degradable	Pack	Case	Case Size Quantity(cm)
Fork	Treated PP		10 X 100	1,000	41.50 x 20.00 x 13.50
Knife	Treated PP		10 X 100	1,000	28.00 x 17.00 x 17.00
Tea Spoon	Treated PP		10 X 100	1,000	43.00 x 19.50 x 15.00
Soup Spoon	Treated PP		10 X 100	1,000	36.50 x 19.50 x 17.00
